Why Provide Sit/Stand Adjustability?

Research indicates a sit/stand workstation provides significant benefits to employees and employers.

- When working at a sit/stand workstation, an employee will change posture approximately 3 or 4 times per day.
- Standing increases respiration and reaction alertness and allows the employee greater mobility.
- A sit/stand environment promotes beneficial postural changes and can improve comfort ratings by 26%.
- Work-related injury/illness can decrease 28%, lost time can decrease 82% and productivity can increase 17% with a sit/stand workstation.
